

Harley-Davidson® MotorClothes®

MEN'S ALL-NEW HEATED GEAR

Designed with the Nanowire™ System

Our Men's Heated Gear offers a completely re-engineered heating system that integrates Nanowire™ technology and a GHC High Density Heat® System.

Strategically placed for uniform heat coverage where you need it most

Requires less amperage than ever before

Lighter wires and wire channels keep you comfortable

Power plugs and wire casings designed to stay pliable in below-freezing temperatures

Jacket Glove Plug
Gloves plug into glove plug on jacket or plug into battery harness when used without jacket or vest

Glove Plug
Gloves plug into jacket

Jacket or Vest Accessory Plug
Gloves and pants can connect into accessory plugs on jacket

Jacket Main Plug
Plugs into power switch or directly to battery harness

Pant Plug
Plug into accessory plug on jacket or vest or plug into battery harness when used without jacket or vest

Power Switch or Thermostat
On/off switch of thermostat plugs between battery harness and garment

Power Plug Battery Harness
Plugs from the vehicle's battery to the power switch

H-D Duel Control Thermostat or Portable Thermostat allows you to regulate the heat output. Thermostats replace the power switch.
