CAFÉ CUSTOM

A café bike starts with a “less-is-more” philosophy. Low-slung bars, rear-set foot controls and a narrow profile define the style. And when stripped of all “unnecessary” accessories, these unburdened motorcycles are lighter, faster and have a harder-edged, rebellious look that reflects the rider’s bare-knuckle attitude.

This Iron 883™ model is caffeine fueled, fully wired and ready to carve up back roads. Equipped with a suite of Café Custom components and a Screamin’ Eagle® fully adjustable suspension, this aggressive riding profile puts you firmly in control.

1 CLIP-ON BARS

Low, narrow clip-on handlebars enable the rider to "tuck in," helping to reduce wind resistance and improve control.

2 BAR END MIRRORS

Bar End Mirrors provide a clean, streamlined look, and the outside-the-grip location eases the view past your hands and shoulders.

3 REAR SET CONTROLS

For the ultimate in aggressive riding posture, Rear Set Foot Controls reposition your feet to encourage a tank-hugging profile.

4 CAFÉ TAIL SECTION

This fast-back solo seat provides the perfect lay-down aggressive riding posture for splitting lanes or carving corners.

A. CAFÉ CUSTOM TAIL SECTION

Create your own link to the Sportster-based racing and performance bikes of the '60s and '70s. This fast-back solo seat and tail section mirrors the look and feel of the iconic 1977-78 Harley-Davidson® XLCR Café Racer model, and re-imagines the style for the modern era. Ideal for use with Clip-On or Sportster Clubman Handlebars and mid- or rear-set foot controls, this seat provides the perfect lay-down aggressive riding posture for splitting lanes or carving corners. The seat's upturned tail and longer nose positions the solo rider closer to the tank for better weight balance, quicker steering and added front-end feedback. The Tail Section is a true bolt-on design that wraps the fender struts, so unlike other café bike kits, there is no cutting, welding or frame modification required. Installation is reversible – you can easily return your bike to the stock look. The complete kit features a sweeping composite tail section with a steel inner support, a deep solo bucket seat with backstop pad and all necessary installation hardware.

This complete gloss black Rear Set Control Kit includes everything you need to move the brake and shift lever to the rear passenger position. This unique kit maintains the standard 1-down and 4-up shift pattern, and can be installed with the Original Equipment low staggered exhaust system. Kit reuses Original Equipment rider footpegs. ENJOY THE RIDE

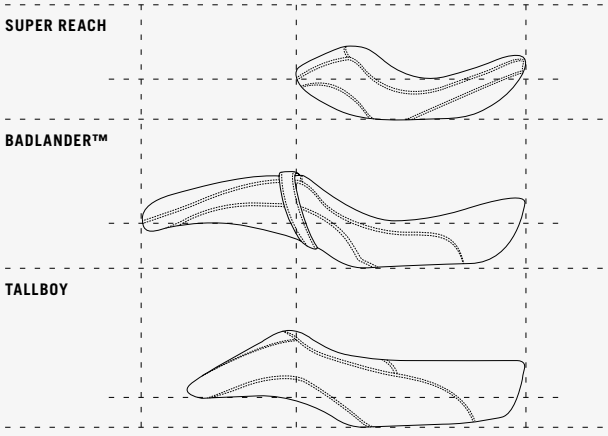
The relationship between the seat, the handlebar and the foot controls has an enormous impact on the comfort, control and confidence you feel when riding your motorcycle. Once you've picked the bike, it's time to choose the options that match your ride to your personal dimensions.

For shorter riders, consider tailoring your fit by changing to a Reach™ Seat, Mid Foot Controls and lowered suspension height.

For taller riders, consider altering your ride by changing to a Tallboy™ Seat and Tallboy Handlebars.

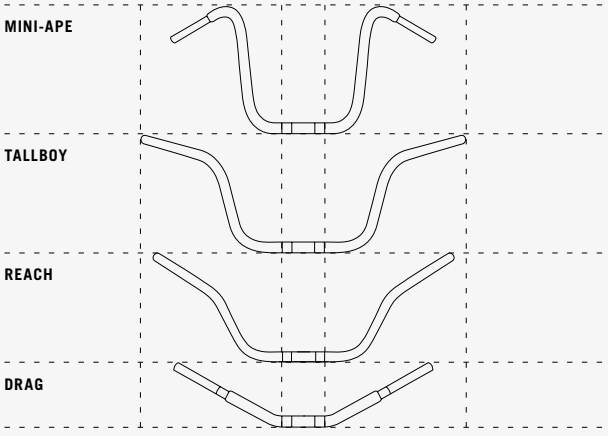
ESTABLISH YOUR POSITION AND FEEL



SEATS

Seat height and shape impact rider comfort, fit and confidence. Where the seat positions you relative to the foot controls, hand controls and the ground plays a major role in the quality of your ride.

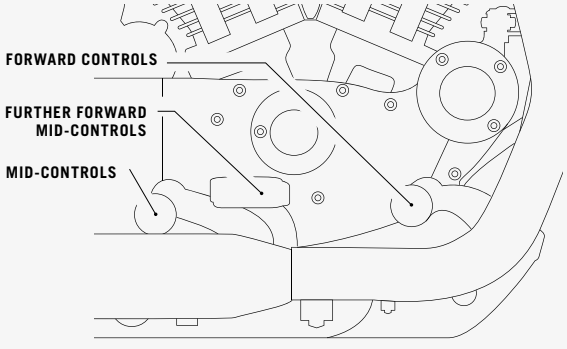
SEE PAGES 54-60



HANDLEBARS

Where the bar positions your arms, hands and wrists directly impacts how you feel on the motorcycle. Choose a bar that falls easily to hand, and does not pull you out of the seat when maneuvering.

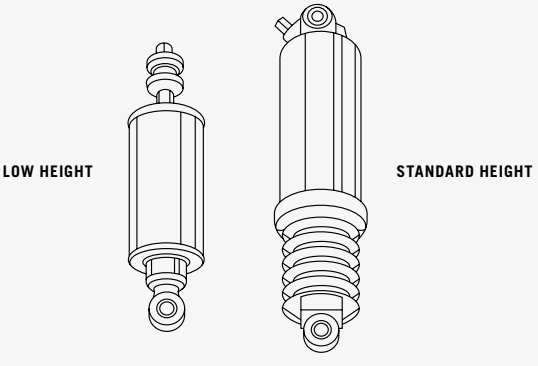
SEE PAGES 590-608



FOOT CONTROLS

Repositioning your feet can relieve muscle tension, take pressure off the tailbone and reduce fatigue. The correct riding position can add hours of comfort and hundreds of miles to your daily saddle time.

SEE PAGES 77-78



SUSPENSION

Adjusting your motorcycle's ride height by raising or lowering the suspension is often the first step in fitting the bike to your stature. Being sure-footed at a stop can really increase your sense of confidence.

Seating – Reach™ &Tallboy™

A. SUPER REACH SOLO SEAT

Get a little bit closer. Super Reach forward position seats are designed to move riders with a shorter inseam even closer to the controls and to bring the legs closer together so that your feet rest firmly on the pavement. After hundreds of hours of on-road and ergonomic testing, the seat shape and foam density were selected as the ideal position for riders 5'-0" to 5'-4" tall. The Super Reach Seat moves the rider 1.5" closer to the controls compared to stock seat on XL883L model, and 2" closer and 0.5" lower compared to stock seat on XL1200C model. The nose is 1.0" narrower than the stock seat, and it is tastefully sculpted to look great with any size Sportster fuel tank. The combination of premium textured and smooth vinyl surfaces and charcoal gray stitching and embroidered Bar & Shield® logo really set the seat apart. For the ultimate solo touring setup, add the Quick Release Rider Backrest P/N 52300245.

BUILDING A BACKREST

A sissy bar upright and passenger backrest are the starting point to build a complete touring machine. The backrest provides long-range comfort and support and adds a feeling of control and confidence for the passenger. Start by selecting model-specific Docking Hardware, then choose a finish that matches your styling direction, determine the desired sissy bar height and finally select a backrest pad that complements your seat.

PREMIUM ADJUSTABLE SUSPENSION

Your motorcycle's suspension defines the riding experience. Fast starts, smooth stops and tight control in the corners are all part of the vehicle dynamics controlled by the tuning of the front forks and rear shocks. Screamin' Eagle® Fully Adjustable Suspension components let you dial-in the ride, whether you're cruising the highway, carving up a country road or dodging city potholes.

1 COMPRESSION ADJUSTER

Fine-tunes suspension to control the upward wheel movement when hitting a bump

Adjusts the speed at which the suspension compresses

Critical for balancing ride quality and suspension bottoming

2 REBOUND ADJUSTER

Fine-tunes the downward wheel movement after riding over bumps or potholes

Adjusts the speed at which the suspension returns from extension

Critical for balancing ride quality and suspension bounce

3 PRELOAD ADJUSTER

Critical to setting the proper suspension travel to soak up large potholes and absorb large bumps

Adjusts for rider sag– the amount the suspension drops under the weight of the rider and cargo

4 PIGGYBACK RESERVOIR

Remote reservoir keeps the shock oil cooler to maintain damping performance

Internal bladder separates the oil from the nitrogen gas to reduce cavitation during aggressive riding

C. PERFORMANCE SUSPENSION KIT – XR1200

C. PERFORMANCE SUSPENSION KIT – XR1200®

Maximize the canyon-carving ability of your XR1200 motorcycle with this complete Performance Suspension Kit. Fully adjustable light-weight suspension system features Showa®'s new Big Piston Front fork (BPF) design. The BPF eliminates many of the internal components used in a cartridge-type fork, simplifying construction and resulting in lighter overall fork weight. The large-diameter of the BPF's internal piston allows a reduction in damping pressure, for better feedback and smoother action. This performance suspension kit also provides a very controlled feeling, which leads to more rider confidence. The BPF's rebound and compression damping force settings are easily fine-tuned via two adjuster screws located on top of the fork bolts. The spring pre-load is adjusted via a M5 hex screw on the axle holders. The rear Showa shocks feature 36mm pistons with piggyback nitrogen-charged reservoirs. The compression damping can be adjusted via a knob on top of the piggyback reservoir. The rebound is adjusted with a thumb wheel on the lower clevis. Rear spring pre-load is also adjustable on the shock for optimum 1G sag. The kit includes one set of Big Piston Front Forks and one set of rear shocks.

54530-10

Fits '08-'13 XR1200 models. Stock on '10-'13 XR1200X™ models. Does not fit with Sport Saddlebag Kit P/N 90328-08.

A. PREMIUM RIDE SINGLE CARTRIDGE FORK KIT*

This Single-Sided Cartridge Fork provides improved handling performance by keeping the tire in contact with the road surface. Tuned to work in concert with the Premium Emulsion Rear Shocks, the fork damping is controlled by a specifically calibrated piston and valve stack. Unlike typical orifice damping, the piston/valve system helps the cartridge fork achieve a linear damping force curve for consistent feel throughout the compression and extension of the front suspension. The cartridge allows the forks to react quickly to rough roads, inspiring rider confidence in sweeping corners. The compression piston provides excellent low speed damping for a better rider feel, and the rebound spring provides a smoother feel during topping. The cartridge fork resists bottoming and dive, and the triple rate spring and oil lock allows the forks to absorb bumps even under hard braking – giving the rider more control while resisting wheel hop. A perfect addition during the installation of chrome or gloss black lower fork sliders, the kit includes fork pipe, cartridge, fork bolts, main springs and oil seals.

45400091 Standard Height.
Fits '04-'15 XL883, XL883C, XL883R, XL1200R, and XL1200V and '04-'10 XL1200C models.

B. PREMIUM RIDE EMULSION SHOCKS*

Experience a comfortable and confidence-inspiring ride – no matter the pavement conditions – with Harley-Davidson® Premium Ride Emulsion Shocks. These fast shocks offer enhanced compression and rebound damping control when compared to typical twin-tube shock absorbers. The nitrogen gas charged shocks resist oil aeration and work with the internal valve stack to provide superior damping control in the twisties. The large pistons and low viscosity high-performance oil allow these shocks to react quickly to impacts and keep the tires tracking the road surface. With the addition of urethane bumpers, you get a controlled ride and minimized bottoming harshness. The locking threaded adjustment lets you fine-tune the spring preload to your current riding conditions–whether a solo run on the back roads or a fully loaded two-up freeway tour. Kit includes left and right shock and preload adjustment spanner wrench.

54000076 Standard Height.
Fits '04-'15 XL models (except XL883C, XL1200T, '11-'15 XL883L, '04-'11 XL1200C and '06-'07 XL1200L).

FOOT CONTROL POSITION OPTIONS

SPORTSTER FOOT CONTROLS
A long stretch to the controls or a knees-high cramped riding position puts strain on your body after even a short ride. Repositioning your feet on the controls relieves muscle tension, takes pressure off the tailbone, and reduces rider fatigue. Where your feet contact the controls can often determine how many miles you can put on in a day.

Many Sportster models can be equipped with the following foot control configurations:

MID CONTROLS:
Original Equipment on some models, Mid Controls position the feet below the knee for a sporting riding posture.

STANDARD FORWARD CONTROLS:
Places the legs for a "feet-in the-wind" laid-back profiling posture.

FURTHER FORWARD MID CONTROLS:
Achieves a comfortable foot-down riding position for the taller rider.

D. STANDARD FORWARD CONTROL KIT*
Add the stretched-out look and extended riding position to your Sportster model. The complete kit includes all hardware necessary to convert your Sportster model from mid controls to forward controls. Available in your choice of finishes, these forward controls add style and long range comfort. (Footpegs and shifter peg not included.)

Fits '14-later XL models. Requires separate purchase of stock or accessory rider position footpegs with wear pegs that fit '14-later XL1200 models.

50700020	Chrome with Black Peg Bracket.
50700021	Black.

Fits '06-'13 XL models with mid-controls (except XL1200CP and XL1200CA). XL1200L requires separate purchase of footpegs P/N 33134-07CAZ and 33135-07CAZ.

33395-06A	Chrome.
33397-07A	Black.

E. FURTHER FORWARD MID CONTROL KIT
Feel a little cramped when your feet are placed on the standard-location mid controls? This kit repositions the controls 3.0" forward of the stock location, eliminating the "knees-high" riding attitude while maintaining a sporty upright riding posture. The forward location provides an open path for your feet to aid maneuvering the bike while parking and improves access to the jiffy stand for a shorter rider. Kit includes control mounts, brake and shift levers, brake rod, mini-footboards with wear pegs and all hardware necessary to convert your mid or forward control-equipped Sportster model.

50700028 Gloss Black.
Fits '14-later XL models.

F. REAR SET FOOT CONTROLS – SPORTSTER MODELS
Transform the on-street profile of your Sportster model. Moving the foot controls to a rear-mounted location takes the riding position from a relaxed cruiser to a solo, aggressive, curve-carving posture. When combined with a Clip-On or Clubman Handlebar, the resulting hands-forward and feet-back profile drapes the rider over the bike and makes you feel a part of the machine. This complete gloss black Rear Set Control Kit includes everything you need to move the brake and shift lever to the rear passenger position. This unique kit maintains the standard 1-down and 4-up shift pattern, and can be installed with the Original Equipment low staggered exhaust system. Kit reuses Original Equipment rider footpegs. Installation requires removal of passenger footpegs and footpeg mounts. For solo rider application only.

50700040 Gloss Black.
Fits '14-later XL883N, XL883L, XL1200CX, XL1200T, and XL1200X models and '18-later XL1200NS and XL1200XS models. Does not fit with Rail Collection Sprocket Cover P/N 34800032. For use with solo seat application only. Installation of Rear Set Controls requires removal of passenger foot pegs, therefore removal of the Original Equipment two-up seat and installation of a solo-only seat is required. See your Dealer for solo seat options.
