# ENJOY THE RIDE

The relationship between the seat, the handlebar and the foot controls has an enormous impact on the comfort, control and confidence you feel when riding your motorcycle. Once you've picked the bike, it's time to choose the options that match your ride to your personal dimensions.

For shorter riders, consider tailoring your fit by changing to a Reach™ Seat, Mid Foot Controls and lowered suspension height.

For taller riders, consider altering your ride by changing to a Tallboy™ Seat and Extended Foot Controls.

NOTE: Some Harley-Davidson seats are made of leather. Fine leathers or other natural materials WILL gain "character," such as wrinkles or wear, with age. This is normal. A fine, aged patina and character wrinkles are a sign of the extremely high-quality materials used to construct your seat or backrest. The appearance of scars or marks on the leather are a result of using natural leather panels and should not be thought of as an imperfection. Please use Harley-Davidson Leather Protectant P/N 93600080 to protect your investment.

## BUILDING A BACKREST

A sissy bar upright and passenger backrest are the starting point to build a complete touring machine. The backrest provides long-range comfort and support and adds a feeling of control and confidence for the passenger.

Start by selecting model-specific Docking Hardware, then choose a finish that matches your styling direction, determine the desired sissy bar height and finally select a backrest pad that complements your seat.

### A. PREMIUM RIDE SINGLE CARTRIDGE FORK KIT\*

This Single-Sided Cartridge Fork provides improved handling performance by keeping the tire in contact with the road surface. Tuned to work in concert with the Premium Emulsion Rear Shocks, the fork damping is controlled by a specifically calibrated piston and valve stack. Unlike typical orifice damping, the piston/valve system helps the cartridge fork achieve a linear damping force curve for consistent feel throughout the compression and extension of the front suspension. The cartridge allows the forks to react quickly to rough roads, inspiring rider confidence in sweeping corners. The compression piston provides excellent low-speed damping for a better rider feel, and the rebound spring provides a smoother feel during topping. The cartridge fork resists bottoming and dive, and the triple rate spring and oil lock allows the forks to absorb bumps even under hard braking – giving the rider more control while resisting wheel hop. A perfect addition during the installation of chrome or gloss black lower fork sliders, the kit includes fork pipe, cartridge, fork bolts, main springs and oil seals.

#### 45400058

Fits '06-'17 Dyna models (except FLD, FXDWG and '07-'08 FXDSE). Original Equipment on FXDLS models.

### B. PREMIUM RIDE EMULSION SHOCKS\*

Experience a comfortable and confidence-inspiring ride – no matter the pavement conditions – with Harley-Davidson® Premium Ride Emulsion Shocks. These fast-acting mono-tube nitrogen gas-charged shocks offer enhanced compression and rebound damping control when compared to typical twin-tube shock absorbers. The nitrogen gas charged shocks resist oil aeration and work with the internal valve stack to provide superior damping control in the twisties. The large 36mm pistons and low viscosity high-performance oil allow these shocks to react quickly to impacts and keep the tires tracking the road surface. You get a controlled ride and minimized bottoming harshness transmitted through the frame. The locking threaded adjustment lets you fine-tune the spring preload to your current riding conditions – whether a solo run on the back roads or a fully loaded two-up freeway tour – and urethane bumpers provide a softer feel if the shock bottoms under load. The beautifully finished shocks feature black-anodized billet top caps and black progressively-wound springs. Kit includes left and right shock and preload adjustment spanner wrench.

#### 54000066 Stock Height.

Fits '06-'17 Dyna models (except FLD and '07-'08 FXDSE). Original Equipment on FXDLS models.

**\*WARNING:** Installation of any accessory suspension components may affect cornering clearance and jiffy stand operation. This could distract the rider, causing loss of control and death or serious injury.

### DYNA FOOT CONTROL\*

A long stretch to the controls or a knees-high cramped riding position puts strain on your body after even a short ride. Repositioning your feet on the controls relieves muscle tension, takes pressure off the tailbone and reduces rider fatigue. Where your feet contact the controls can often determine how many miles you can put on in a day.

Dyna models can be equipped with the following foot control configurations:

#### MID-CONTROLS:

Positions the feet below the knee for a sporting riding posture.

#### FURTHER FORWARD MID-CONTROLS:

Achieves a comfortable foot-down riding position for the taller rider.

#### REDUCED REACH FORWARD CONTROLS:

Provides a foot-forward boulevard style without straining to reach the controls.

#### STANDARD FORWARD CONTROLS:

Stretches the legs for a "feet-in-the-wind" laid back profiling posture.

#### FLOORBOARDS:

Supports the entire foot and places the rider in a comfortable upright position.

### B. REACH™ FORWARD CONTROL KIT\*

Want to stretch the riding position of your mid control-equipped model, but not comfortable with the long reach to factory-position forward controls? This complete kit is the perfect alternative. It positions the feet up and forward 10.0" from the mid control position, but 1.0" closer to the rider than the standard position factory forward controls, placing the rider's boot at a comfortable pivot point for improved support and leverage. Available in chrome or gloss black finish, the kit includes left and right footpeg supports, brake and shift lever assemblies, brake and shift linkages and all required hardware.

Fits '06-'17 Dyna models equipped with mid-controls. FLD models require separate purchase of footpegs.

**50700008** Chrome.

**50700007** Gloss Black.

### C. REACH FORWARD CONTROL CONVERSION KIT\*

Love the look and riding position you get with forward controls but not comfortable with the long stretch forward? This Forward Control Conversion Kit repositions the Original Equipment footpegs and foot controls up and back by over 1.0", positioning the controls closer to the rider for added comfort and confidence. The reduced reach places the rider's boot at the proper pivot point for improved leverage, while maintaining the "foot-forward" riding profile. This easy-to-install Conversion Kit includes heavy-duty steel mounts and shortened brake rod. Kit reuses Original Equipment control supports and brake and shift levers or can be personalized with your choice of custom lever styles.

**50700005**

Fits '03-'17 Dyna models (except FLD) equipped with forward controls.

### D. FURTHER FORWARD MID-CONTROL KIT\*

Feel a little cramped when your feet are placed on the standard-location mid controls? This kit repositions the controls 2.0" forward of the stock location, eliminating the "knees-high" riding attitude while maintaining a sporty upright riding posture. The forward location provides an open path for your feet to aid maneuvering the bike while parking and improves access to the jiffy stand for a shorter rider. Kit includes chrome left and right footrest brackets, highly polished brake lever and chrome shift lever. Use stock footpegs, brake and shift linkages or choose from other Dyna collection offerings to complete your look.

The installation places the rider into a comfortable upright posture with a flat foot and bent knee profile. This position provides additional support by allowing the legs to take some of the rider's weight, while providing the freedom to reposition the feet during the ride. The kit includes left and right footboards with inserts, footboard supports, brake lever, brake and shift linkage, brake pedal pad and all required hardware.
