STREET BOB®

MILWAUKEE-EIGHT® SOFTAIL® | FXBB | RIVER ROCK GRAY

This junkyard dog is a little meaner than you remember. With classic style like 80Grit footpegs, Quarter Fairing and Moto Bar, it's less of a Street Bob model and more of a back-alley bruiser fresh from the West Coast.

LOW RIDER®S

MILWAUKEE-EIGHT® SOFTAIL® | FXLRS | VIVID BLACK

Club culture makes it iconic, the blackout-style makes it notorious. This Low Rider S model is the hero of stripped-down motorcycles, but whatever shine it had, it traded for sleeker all-black parts and accessories from engine hardware to fuel caps. The West Coast never looked this good.

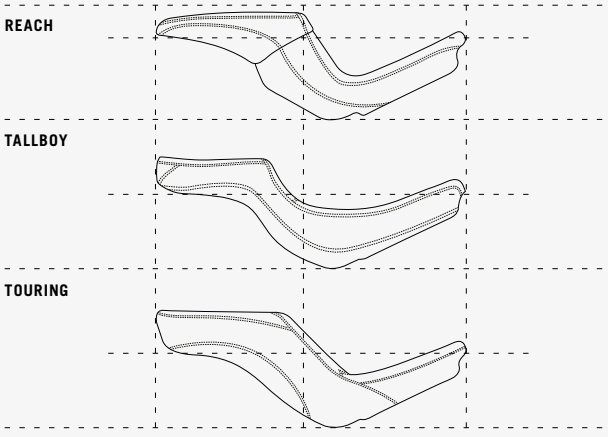
ENJOY THE RIDE

The relationship between the seat, the handlebar and the foot controls has an enormous impact on the comfort, control and confidence you feel when riding your motorcycle. Once you've picked the bike, it's time to choose the options that match your ride to your personal dimensions.

For shorter riders, consider tailoring your fit by changing to a Reach™ Seat, Mid-Foot Controls, and lowered suspension height.

For taller riders, consider altering your ride by changing to a Tallboy™ Seat and Extended Foot Controls.

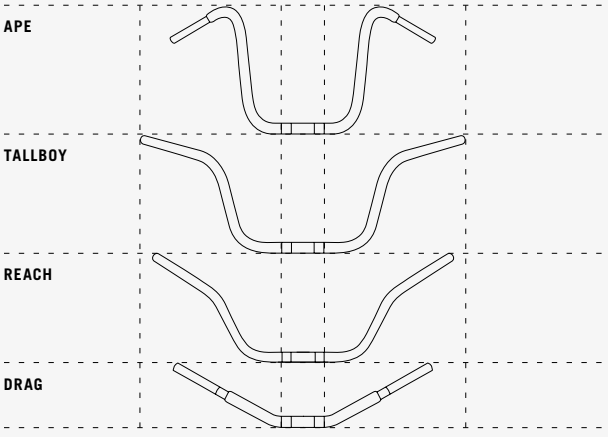
ESTABLISH YOUR POSITION AND FEEL



SEATS

Seat height and shape impact rider comfort, fit and confidence. Where the seat positions you relative to the foot controls, hand controls and the ground plays a major role in the quality of your ride.

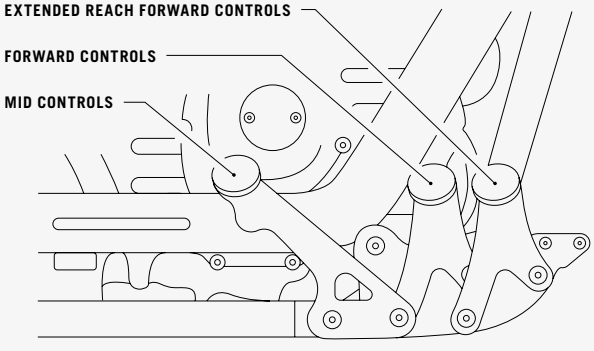
SEE PAGES 159-170



HANDLEBARS

Where the bar positions your arms, hands and wrists directly impacts how you feel on the motorcycle. Choose a bar that falls easily to hand, and does not pull you out of the seat when maneuvering.

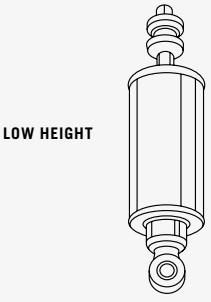
SEE PAGES 590-608



FOOT CONTROLS

Repositioning your feet can relieve muscle tension, take pressure off the tailbone and reduce fatigue. The correct riding position can add hours of comfort and hundreds of miles to your daily saddle time.

SEE PAGES 185-189



SUSPENSION

Adjusting your motorcycle's ride height by raising or lowering the suspension is often the first step in fitting the bike to your stature. Being sure-footed at a stop can really increase your sense of confidence.
